General Comment:

On 7/6/2020 Catherine Roy conducted a reclamation and stormwater inspection in response to complaint number 200449052 in regard to weeds at this location. During this inspection the following compliance issues were observed: See below, and attached photos for additional detail.

-Followup weed treatment needs to be conducted by 11/1/2020.

-Stormwater controls need to be designed to prevent potential undesirable discharge into the Pine Gulch Stream by 7/30/2020.

Inspector contacted complainant on 7/6/2020 via phone. Complainant said that weeds were sprayed right after complaint was issued. Inspection was conducted to assess the efficacy of the weed spraying.

-See inspection number 693901978 for related inspection on adjacent well pad location.

1003 f. Weeds Noxious weeds? _____

Comment Approximately 200 musk thistles observed wilting from herbicide treatment throughout the project area. Russian knapweeds (approximately 1000 individuals) in the southern project area are largely herbicide treated. However, knapweed individuals with no herbicide treatment observed.

Corrective Action Control weeds at the appropriate time, and no later than 11/1/2020. Per CSU extension, control of Russian knapweeds requires a multi-pronged treatment approach as a single control strategy will not likely be sufficient. Areas treated for Russian knapweed should be re-seeded with desirable perennial grasses in the fall to compete with the treated knapweed. Followup inspection will be conducted.

Date 11/01/2020

Comment:	Stormwater diversion/cobble run-down within the northern project area diverts discharge from the well pad toward the Pine Gulch stream, which flows less than 30 feet from the edge of the project disturbance.		Date: 07/30/2020
Corrective Action:	Due to the potential for sediment and other undesirable discharge from the project area, stormwater flows need to be diverted away from the waterway to prevent any undesirable discharge from entering the stream.		
Pits: <input checked="" type="checkbox"/> NO SURFACE INDICATION OF PIT
