**General Comment:**

On 7/8/2020, Reclamation Specialist Trujillo conducted a final reclamation and stormwater inspection at Caerus Piceance's Wood 3-32 location in Mesa County, Colorado.

This inspection in response to a 1001.c, 502.b reclamation variance request:

Operator submitted doc. #402378976 on 4/30/2020 requesting that ~½ mile of access road be left un-reclaimed and that partial contouring of the pad is conducted per the request of the surface owner. This inspection is to identify the current conditions of the location and/or any concerns that may exist, and is part of the detailed technical review process per the "1001.c: Reclamation Variances and Waivers" operator guidance document. Please refer to the guidance document for additional details.

**Please note:**

The submission of a variance request does not guarantee approval. The COGCC will provide notice to Operator once an official decision has been made. All portions of the location not included in the variance request remain under COGCC jurisdiction until passing final reclamation. Approval of a variance does not absolve the operator from possible enforcement due to past non-compliance with reclamation rules for the subject location.

It was observed in this inspection that reclamation of the pad appears to be progressing, and appears to be near meeting revegetation requirements. Signage remaining on the Location with incorrect Operator information; Signage should either be updated or removed from Location.

Refer to the "Location" and "Reclamation" sections of this inspection report for additional details.

Refer to the photo-documentation attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

**Location**Overall Good: ☒

Emergency Contact Number:

Comment: It was observed in this inspection that two signs remain on the Location with incorrect Operator information. Signage will need to be removed for final reclamation to be passed and therefore is no longer needed on the Location. If Operator wishes to keep signage on the Location, it will need to be updated with the correct Operator information.

Corrective Action: Update sign information to comply with 210 Rules, or remove from Location pursuant to 1004 rules.

Date: 07/27/2020

Overall Good: ☒**Spills:**

Type	Area	Volume		
------	------	--------	--	--

In Containment: No

Comment: ☐ Multiple Spills and Releases?**Fencing/:**

Type	LOCATION		
Comment:	Perimeter fence appears to be in proper functioning condition. Once site has achieved reclamation standards and is ready for final passing, fence will need to be removed.

**COGCC Comments**

Comment	User	Date
<p><span style="color: blue;">Operator submitted a 502.b SOVR to waive reclamation requirements of the oil and gas access road, and to partially contour the pad. Records show well was plugged 6/25/2008. Per 1004 rules, final reclamation activities were required to be completed by 6/25/2009; It is noted that the variance request is being submitted almost 11 years after reclamation was required per rules</span></p> <p><span style="color: blue;">With exception to the reclamation of the access road and contouring requirements, reclamation of the disturbance areas appears to be progressing towards 1004 standards. Qualitative assesment of the Location suggests uniform desirable vegetation establishment appears to be near, or has met the 80% cover requirements. Transects will be conducted in a followup inspection to confirm. Cheatgrass evident, however no other apparent reclamation issues observed.</span></p>	trujilloam	07/10/2020
