General Comment:
 This is a reclamation inspection of the RHOADES 11-11 #2 well site which was plugged and abandoned on 5/13/2009. The location is not in compliance with the Final Reclamation requirements. Previous corrective actions have not been performed. See attached photos and additional details within this report.

All disturbed areas must be recontoured, properly decompacted by cross ripping to a depth of 18 inches, have an adequate seedbed prepared, and then seeded with a seed mixture that reflects the surrounding vegetation. Erosion controls must be implemented that stabilizes the seeded soil. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Continue to monitor and manage this site until Final Reclamation has Passed.
