COMMENTS:

Well is uneconomic at current gas prices

The well will be evaluated during each TA renewal for oppourtunities to return it to production

CASING AND CEMENTING CHANGES

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____

COMMENTS:

Best Management Practices

No BMP/COA Type

Description

--	--	--

Operator Comments:

The Columbine Springs well have utility as producers at a sustained \$3.25/mcf. The CBM field's water production at lower gas prices makes the well uneconomic. The wells are unable to produce without moving water. The wells have a cast iron bridge plug above the perms, and a wellhead master valve at the surface. The well was last MIT'd in September, 2018. Thanks

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.

General Comments

User Group	Comment	Comment Date
Engineer	At what gas price is required to make this well economically viable? Is it a value that can be achieved in the near future? We ask for a more concise plan for this well. MIT Status?	07/25/2019
