COGCC Comments

Comment	User	Date
1" x 1.5" hole was observed. Salt staining throughout the floor of the secondary containment has been addressed from the June 20, 2020 inspection. Concrete supports/anchor/weights placed directly on secondary containment liner are deteriorating with exposed rebar. Folds in the liner were observed throughout the secondary containment. There was no evidence of fluids on the outside of the secondary containment. Surface staining noted near load out areas.	fischera	07/29/2020
