Mr Bob Koehler

Colorado Oil & Gas Conservation Commission

1120 Lincoln Street, Suite 801

Denver CO. 80203

Dear Mr Koehler:

I hereby request a hearing for the ROY SWD#1 well: Surface Hole Location planned at 326' FNL, 2,007' FEL, NWNE Sec. 28-T1N-R66W, Weld County, Colorado.

My concerns are about, but not limited to: contamination of my domestic well permit number 184986, nearby surface water contamination and contamination my irrigation pond, wildlife and bird habitat within 1000'.

I question the casing integrity, inspection and regulatory oversight, and potential for hazardous waste to to be injected into a well. Simply because oil and gas recovery waste is exempt from being called hazardous waste does not make it non-hazardous for residents in my area. My concern is for the long term health and safety of my community, as well as, overall ecosystem health.

Sincerely,

Ellen Oman

August 23, 2018

Ms. Ellen Oman
P.O. Box 337
Brighton, CO 80601

Dear Ms. Oman,

This letter is to acknowledge receipt of your four (4) letters dated August 5, 2018. In your letters you request a hearing before the Colorado Oil and Gas Conservation Commission regarding the proposed NGL Water Solutions DJ, LLC Roy SWD #1 through Roy SWD #4 wells. The Surface location for these proposed wells is in Section 28 Township 1 North Range 66 West of Weld County.

At this time the Colorado Oil and Gas Conservation Commission has not received permit applications from NGL Water Solutions DJ LLC for the Roy SWD #1 through Roy SWD #4 wells. Therefore we feel it is premature to proceed with processing your request for a hearing.

We are requiring NGL to send a second letter to you and fellow mineral and surface owners at the same time they file formal permit applications. At that time you can resend your letter (one letter with a list of well names is sufficient). COGCC recommends that you send us a second letter of protest to ensure your request is considered with the applicable permit application.

Please be aware that in order to be granted a hearing before the Commission, you must submit a detailed written explanation of how the construction and injection into these proposed wells would harm your personal water well, nearby surface water, irrigation pond, wildlife, and/or bird habitat. Your reasons must be specific. We recommend you hire legal counsel to prepare your statement and represent you before the Commission.

Please feel free to contact me if you have further questions.

Sincerely,

Robert P. (Bob) Koehler, PhD.
UIC Lead, Geology Advisor
