COMMENTS:

On 8/26/2020, a Form 17 was completed with a beginning pressure of 51 psi. Gas was present at the beginning of the test. Gas was not continuous and a sample was collected. Blew down to 0 psi in less than 5 minutes. There was no flow at the end of the test. Due to the initial pressure being high, Noble will install automation, monitor and blow down as needed for a period of 6 months, ending 2/26/2021. A gas sample was collected during the Form 17 and will be submitted once the lab analysis is complete. No mitigation measures have occurred to date, the blow downs will begin after email communication with the COGCC engineer, Curtis Haverkamp.
