COMMENTS:

Bonanza Creek respectfully requests continued TA status. The Antelope 24-20 was plugged back with CIBP @ 6249' with 2 sacks of cement on 5/18/2019. Form 5A to report TA status of Nio/Codell was submitted 06/13/2019 (Doc #402065046). The well was SI and plugged back due to well being "TA'd due to offset frac of Bonanza Creek's Antelope J-20 Pad." per Form 5A. The well is closed to the atmosphere via valve locked out and tagged out at the master valve. Informal pressure test taken at time of bridge plug setting; pressure held at 1000 psi for 10 minutes. This well will remain TA'd. An annual TA sundry notice will be submitted in 3rd Quarter 2021 to update the COGCC on the plans of this well. Due to the current COVID-19 pandemic and economic hardship the P&A of this well is being pushed back, Bonanza has plans to P&A this well prior to the next MIT deadline.

CASING AND CEMENTING CHANGES

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

--

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____
