### CORRECTIVE ACTIONS:

**1** CA# 141644

Corrective Action: Install BMPs to prevent wildlife access to cellar.

Date: 06/13/2020

Response: FACTUAL REVIEW REQUEST

Basis for Review: Action requested was already completed prior to the inspection

Operator Comment: As noted in the FIRR (402409652), wildlife BMPs have been added to allow wildlife an escape route. Photos taken by inspector show t-post as the escape route. The cellar is only ~3' deep so mice are the only mammals that would potentially get trapped in the cellar. They are able to escape up the t-post. BMPs over well cellars to prevent mice access is not a rule. In addition, the mice would just crawl through the grate if one was added. Other wells in the State of Colorado are not being held to the standard to prevent wildlife access to cellar.
