477881	SPILL OR RELEASE	AC			-	Park U-4-9XRLC Flowline	EI

**General Comment:**

**Environmental****Waste Management:**

Type	Management	Condition	GPS (Lat)	(Long)
Oily Soil	Piles	Adequate		
Comment	Temporary stockpile of impacted soil present with hauling for offsite disposal in progress.			
Corrective Action				Date:

**Spill/Remediation:**

Comment:	COGCC Environmental Staff followup to flowline spill reported on the multiphase flowline from the Park U-4-9XRLC flowline. Failure point is in flowline trench in rangeland. Depth to groundwater is approximately 3 feet. Small excavation at failure point was open at time of site visit but flowline was not visible. Impacts to groundwater confirmed by visual inspection. A water well is mapped nearby to the west of the spill source area, but the water well could not be field located. Operator is directed to field verify actual location of water well, if possible, and report findings on Form 19 Supplemental Report. Immediate efforts by Operator to contain release appear adequate to prevent surface migration. Operator will be required to submit a Form 27 for a groundwater investigation per Rule 909.c.			
Corrective Action:				Date: _____
