**General Comment:**

This is an orphaned well inspection. Inspection completed to document emergency work completed 9/17/2020 and 9/18/2020 in response to complaint document number 200449102.

As part of this completed work flow line risers were excavated and cement plugged and abandoned. Trimble GPS readings were taken to accurately report flow line ends points and update well location. GPS locate was accomplished using a Trimble Model / 99133 Serial number 6020496142.

Inspection may also identify possible task required for final closure/release of location from the Orphaned Well Program.

See link at end of report for path to downloadable pictures and GPS screen shot data.

**Location**

<b>Lease Road:</b>			
Type	Access		
comment:	Lease access road was reseeded by landowner. Access for this work was negotiated and access was granted through adjoining landowners property.

Comment: Erosion gully off the NE corner/side of location. Gully is 1' at top and widening to 11' wide down slope. Depth is 1' at top, approximately 5' at mid point and shallowing as it runs down slope.

Corrective Action:  Date:

**Pits:** ☒ NO SURFACE INDICATION OF PIT

**COGCC Comments**

Comment	User	Date
Current project work is complete.	stjohnw	09/22/2020
With operator currently in bankruptcy emergency work was authorized and completed by COGCC Orphaned Well Program in response to formal landowner complaint document number 200449102.		
When location is moved into OWP additional task will be created for location addressing remaining equipment decommissioning, well plugging and abandonment, possible environmental task and location reclamation.		
Unused tank on location will be removed by adjoining landowner. He has requested additional tank when tank is drained and cleaned in future work.
