SUMMARY OF WORKOVER ON WEBSTER NO. 1

November 8, 1947: Killed well with 11# mud. Installed BOP. Pulled packer loose. Layed down tubing. Replaced leaking seal ring in casing head. Tested casing with 1200#. Tested OK.

Landed 13 joints of 2 7/8" tubing and 245 joints of 4 1/2" tubing at 5383' from PDF with Lane Wells Production Type Packer set at 5042' and Bowen safety joint at 5010'.

Pressured up on packer to 1200#, dropped very slowly to 1100#, indicating same casing condition as after the last workover.
