TRANSECT RESULTS OF REFERENCE AREA% \_\_\_\_\_

TOTAL % OF DESIRABLE VEGETATION COVER \_\_\_\_\_

VEGETATIVE COVER \_\_\_\_\_

Comment: The vegetation along the roadside and at the location has not established for long term stabilization. It appears additional seeding and hydromulch may have been performed. There is an area of noxious weeds observed along the road where disturbance occurred from the road slough. There is still time to do fall weed control if done soon.

Corrective Action:

Date **10/09/2020**

Comply with Rule 1004.e

Overall Final Reclamation

Well Release on Active Location ☐Multi-Well Location ☐**Storm Water:**

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: The entire length of the access road to the location has been graveled. There are areas along the road where erosion is beginning to occur. Ongoing erosion control will need to be performed. The road will need to be stabilized for long term stabilization. The area of the road where the soil slough occurred was repaired and a culvert was installed. It was observed that additional sloughing may have occurred due to exposed liner. This area will need to be monitored for long term stabilization.
