To COGCC Director Julie Murphy,

As part of the Form 2A permit process for the SBJ 22-13HZ oil and gas location (Doc# 402376823), Kerr McGee Oil & Gas Onshore LP (KMG), mailed notices including the COGCC Fact Sheet to residential building unit owners and residents identified within 2,000 feet, of the beforementioned oil and gas location (see attached map and notices). Eight notices were sent by US mail on July 27th, 2020.

The Colorado Response Line phone number was provided in the notice as well as contact information for both the COGCC and the Weld County LGD.

Since the health notices were sent we have had a conversation with the surface owners to the east. Their comment were related to 4 topics:

- View corridor from their home, and permeant lights on the facility, which we addressed by identifying that there are two lights next to the door entries on the LACT buildings facing south, away from their home
- They asked about the gas and oil takeaway pipeline easement location, requesting it be relocated further from their property. KMG has contacted the midstream company, WES (Western Midstream) to convey the adjacent surface owner's request to relocate the pipeline further from their property
- They asked about the alignment of an irrigation ditch and we confirmed it would be restored at during the interim reclamation phase. This irrigation ditch provides them with irrigation water as they farm on this parcel
- They asked about fencing, KMG is reviewing their request and provide security fencing for the wells and facility
- Lastly, they are mineral owners and had questions about mineral interest and a Landman answered their questions

Please reach out to us with any questions regarding this notice.

Sincerely,

Tracy Colling|Sr. Municipal Planning Analyst
