Flowline System

The Flowline Report, Form 44, shall be submitted to register, report realignment, report removal from service, provide pre-abandonment notices, or report abandonment of Off-Location Flowlines, Flowline Systems, Produced Water Transfer Systems, or Crude Oil Transfer Lines or Systems as required by the 1100 Series Rules. The Form 44 shall also be submitted to register, report realignment, or report abandonment of Domestic Taps, and to report Grade 1 Gas Leaks from Flowlines per Rules 610 and 906.

Operator Information

OGCC Operator Number: 10071 Contact Person: Wesley Collins
Company Name: HIGHPOINT OPERATING CORPORATION Phone: (970) 7760949
Address: 555 17TH ST STE 3700 Email: wes@ecopoint-inc.com
City: DENVER State: CO Zip: 80202
Is the Operator a Tier One member of the Utility Notification Center of Colorado (CO811) that participates in Colorado's One Call notification system? Yes No

FLOWLINE SYSTEM

FLOWLINE SYSTEM IDENTIFICATION

Facility ID Number: 469325 Flowline System Name: AEF_5-61-34_NESE_05056134ad_

FLOWLINE SYSTEM REGISTRATION

A representative legal location and associated latitude and longitude near the center of the Flowline System.

County: WELD
Qtr Qtr: NWNW Section: 35 Township: 5N Range: 61W Meridian: 6
Latitude: 40.362690 Longitude: -104.184433
GPS Quality Value: 1.2 Type of GPS Quality Value: Accuracy in Meters Measurement Date: 09/04/2019

FLOWLINE DESCRIPTION AND TESTING

Date Construction Completed: 01/19/2019
Pipe Material: Carbon Steel Bedding Material: Native Materials
Max outer Diameter (inches): 8.000 Type of Fluid Transferred: Natural Gas
Max Anticipated Operating PSI: 1100 Testing Pressure: 1240 Test Date: 01/19/2019

Description of Corrosion Protection:

The main gathering and injection pipeline system is provided CP current through 4 impressed current cathodic protection systems located throughout our field. These lines are not on this system, so the extent of its CP is delivered by Anode bags placed periodically along the right-of-way lines.

Description of Integrity Management Program:

HPOC flowlines are pressure tested initially and periodically in accordance with the requirements of COGCC Rule 1104. Initial flowline pressure testing is conducted in accordance with Rule 1104.a and 1104.h prior to placing new flowlines into service. Annual and tri-annual flowline pressure testing is conducted as prescribed in Rule 1104.

Flowlines are tested at OR above Max Anticipated Operating Pressure, which is determined by historical operations data or anticipated operating conditions. Flowline pressure tests are conducted for at least 30 minutes, unless otherwise specified by the particular industry standard. A pressure drop over the duration of the test exceeding 10% of the starting pressure is considered a failed test, unless the particular industry standard calls for a different threshold of failure.

On-Location:

Below Ground ????Tri-annual pressure testing

Above Ground ????Monthly AVO inspections

Off-Location ????Annual pressure testing

Dump Lines Annual

Description of the construction method used for public by-ways, road crossings, sensitive wildlife habitats, sensitive areas, and natural and manmade watercourses (i.e., open trench, bored and cased, or bored only), if applicable.

Bored under county road, no sensitive habitats apply.

FLOWLINE SYSTEM REALIGNMENT

Date: 07/10/2020

Description of Realignment:

Submitting new Form 44 to update GIS information and CP/IM to comply with 2020 Rulemaking. Lines have been located and mapped with submeter equipment.

OPERATOR COMMENTS AND SUBMITTAL

Comments Submitting updated GIS to comply with 2020 Rulemaking

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
