Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

At approx. 2:00 pm on 3/30/2020 during pumping operations, operator noticed a mist coming from the pipeline right of way near the Long Ridge J15. Operator called it in and began shutting in wells, isolating and blowing down the line. This is a 3 phase line so there is produced water mixed with condensate. The mist melted the snow in a 5'X15' area estimated to be less than 5bbl. Clean up will begin as soon as we can clear the roads of snow and safely get equipment and crews on site.
