## DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
UNDETERMINED	GROUNDWATER	TBD	Installation of Monitoring Wells

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

The Eberle 13-32 CHZ facility was initially owned and operated by Synergy Resources. PDC Energy acquired the facility in January 2020. PDC is following up to install three (3) monitoring wells at the facility that Synergy Resources voluntarily agreed to install. PDC's proposed follow up activities were discussed and submitted to COGCC staff on October 1, 2020.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

☐ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

### Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

Three monitoring wells will be installed within and down-gradient to the current facility extent. Proposed well locations are illustrated on Figure 1. Following installation, monitoring wells will be surveyed and sampled to assess water quality conditions and determine a groundwater flow direction. Groundwater samples will be submitted for laboratory analysis of benzene, toluene, ethylbenzene, total xylenes (BTEX) using EPA Method 8260B.

### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

## Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):
