#### Check if impacted or threatened by spill/Release (please answer Yes/No to all that apply):

Waters of the State ☐ Residence/Occupied Structure ☐ Livestock ☐ Public Byway ☐ Surface Water Supply Area ☐

*As defined in COGCC 100-Series Rules*

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

A separator released approximately 5 bbls of produced water and 10 bbls of oil to the ground outside of containment. The cause of the release is still under investigation, but is believed to be related to internal corrosion and the improper installation of a drain plug. The release was completely contained to the pad footprint. The impacted media will be removed and hauled to a COGCC approved disposal facility. Confirmation soil samples will be collected and submitted for laboratory analysis. Soil samples will be analyzed for TPH-DRO, TPH-GRO, BTEX, pH, EC, and SAR. Analytical results will be included in a supplemental Form 19.
