COMMENTS:

Request to combust is being made as a result of Anadarko/Western Midstream shutting down their Third Creek Gathering System in May of 2018 which was the gas sales outlet for the Ferguson #6-25. Attempts to acquire strategic portions of the Third Creek System have been stymied by Anadarko and their complete unwillingness to consider any transfer of ownership. Anadarko/Western Midstream also operates the only other active gas infrastructure within 10 miles of the lease. Anadarko/Western's Wattenberg Gas Gathering System is approximately 2 1/2 miles away and the Ferguson #6-25 could easily be hooked up utilizing good now abandon high pressure piping segments of the Third Creek System. Anadarko/Western has been completely unresponsive to these proposals and ideas.

It is estimated that approximately 12 MCFD from the well will be flared using a central tank battery 98%+ combuster. A gas sample collected 8/10/2020 tested no H2S present in the gas and is attached.

Verification of APEN filing for gas venting/combustion is also attached (facility AIRS ID:001-1479).

Description

Operator Comments:

This flaring request is being made necessary by the completely unprecedented shutting own in May of 2018 of the Anadarko/Western Midstream Third Creek Gathering System. The Ferguson #6-25 is making approximately 5 BOPD and 12 MCFD. Oil revenue dominates the economics of this well.
Given Anadarko/Western Midstream Partners defiant attitude in utilizing their legacy assets in the area to reconnect wells it is not known when a gas deposition solution will be found for this leases gas combustion. It is hoped that COGCC could possibly broker a resolution to this impass.
