General Comment:

This is an orphaned well inspection with emphasis on critical maintenance, verification and inventory of equipment, and identifying possible task required for potential well plugging and abandonment, flowline removal/abandonment, and equipment decommissioning/removal.

Well is part of Orphaned Well Program all other open/required task for well/location abandonment remain open until completed and closed.

Inspection may also identify possible task required for final closure/release of location from the Orphaned Well Program.

See link at end of report for path to downloadable pictures.

Location

Lease Road:			
Type	Access		
comment:	Gated access road is two track off maintained CR. Two track road is used by rancher and part of road is clearly visible. The unused and unmaintained portion is tougher to follow. The road crosses a drainage area that may need to be evaluated and leveled for large equipment and truck traffic.

Comment	User	Date
Well location is flat with no production related equipment to remove. Wood debris and production related pipe will be small clean up. Main area of concern is access road where it crosses low/drainage area and the road has deteriorated. Fill and leveling may be required for large equipment and trucks for access. Dry grassland area and operator should be limited use limited foot print to prevent surface damage for reclamation.	stjohnw	10/22/2020
