**General Comment:**

COGCC Environmental Inspection of Central Tank Battery Spill (Spill/Release ID #478242) and follow-up to Operator's eForm 19 Spill/Release Reports (docs #402504948 and #402508988). Weather conditions during inspection were cloudy with a temperature of 21 degrees Fahrenheit.

Operator's Spill/Release reports document the release of approximately 3 bbls of production fluids (oil and produced water) from a steel pipe resulting in impacts to surface soil within the tank battery SPCC area and leading into a lined pit. On inspection date, the Operator's staff was on location to remove material from a lined pit downhill (north) of spill location. Surface impacts (hydrocarbon stained soil, odor, and localized fluids) remained along flow path on inspection date. See photos.
