RECLAMATION**INTERIM RECLAMATION**

☐ Interim Reclamation will commence approximately _____

Per Rule 1003.e.(3) operator shall submit Sundry Notice reporting interim reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Interim reclamation complete, site ready for inspection.

Per Rule 1003.e(3) describe interim reclamation procedure in Comments below or provide as an attachment and attach required location photographs.

Field inspection will be conducted to document Rule 1003.e. compliance

FINAL RECLAMATION

☐ Final Reclamation will commence approximately _____

Per Rule 1004.c.(4) operator shall submit Sundry Notice reporting final reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Final reclamation complete, site ready for inspection. Per Rule 1004.c(4) describe final reclamation procedure in Comments below or provide as an attachment.

Field inspection will be conducted to document Rule 1004.c. compliance

COMMENTS:

The sundry approved 2/7/2020 for a blowdown mitigation strategy (DOC#: 402187002) stated an approximate start date of 10/1/2019 with six months of consecutive blowdowns approved. Extraction began blowdowns 3/21/2020 and closed out the blowdown mitigation strategy with the Form 17 dated 8/27/2020. Attached are the results of the blowdown mitigation strategy. The blowdown mitigation strategy was unable to successfully mitigate the bradenhead pressure below 50psi. Pressure and flow rate data were collected during the blowdown process and showed a flowrate of 8.99 MSCF/D and a volume of 0.137 MSCF. Additionally, a bradenhead and production gas sample were taken for comparison. The bradenhead gas sample is 83.93 MOL % Methane. Further analysis shows that the bradenhead gas sample is thermogenic in origin. When compared to the production gas sample taken the bradenhead gas sample is not as thermally mature as the production gas sample taken from the Codell completed interval. This indicates the bradenhead gas is sourced from a shallower formation in the well. To comply with the operator guidance Extraction intends to submit a Form 6 NOIA and plug the well.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____
