CORRECTIVE ACTIONS:

1  CA# 136760

Corrective Action: Comply with Rule 1004 to remove the access road point and culvert. Collaborate with the landowner to determine mitigating measures that will allow reclamation work to be conducted in such a manner as to not interfere with agricultural activities or crop production.

Date: 02/25/2020

The corrective date is not intended to be the date for which the Operator shall complete the corrective actions but rather the corrective date is the date the location was observed out of compliance.

Response: CA COMPLETED Date of Completion: 10/29/2020

PDC submitted a SOVR via Form 4 (# 402521786) for the former SRC sheep location. The variance is for the

Operator Comment: surface owner to keep the access point. The location inspected last year was harvested for Silage corn, which cuts the entire stalk short and compared to the reference area which was harvested for grain corn, thus longer stalks. After an inspection and speaking with the surface owner, he is satisfied with the 2020 crop and expects the crop to be similar to the reference are in 2021. PDC will continue to monitor this location and if additional work is warranted, then it will be completed. The original access road has been reclaimed and the corn appears to be similar to the reference corn; however the access point and cattle guard has a variance to be used for agriculture operations.

COGCC Decision: Approved pending re-inspection

COGCC Representative: COGCC acknowledges PDC's intent to pursue a variance. Be aware that a submission for a variance request does not guarantee approval; corrective action(s) and action date(s) would remain applicable until resolved if request is denied.
