\* - TPH level below COGCC sensitive area allowable level of 1,000 mg/kg. Additional excavation was conducted and a new confirmation sample tested.

B - (EPA) The indicated compound was found in the associated method blank as well as the laboratory sample.

J3 - Associated batch QC was outside established QA range for precision.

J6 - Sample matrix interfered with the ability to make any accurate determination; spike value is low.

O - ESC - Sample diluted due to matrix interferences that impaired the ability to make an accurate analytical determination. The detection limit is elevated in order to reflect the necessary dilution.
