RE: Request for Consideration to be Given for SAR and EC Per FAQ 32

REM #: 4812
Date of Spill: 07/22/07
Spill Site: Vega 11 Pad, Loc #334490

Dear Alex:

The Vega 11 pad sampling results from 07/23/07 indicate an elevated reading for SAR and EC. At the time of final reclamation, the Vega 11 pad will be buried under a minimum of three feet of backfill cover and soil that satisfies either the Table 910 level for SAR and EC or the background levels for SAR and EC within three feet of the ground surface at the site. The pad will be reclaimed in accordance with the 1000 Series Rules. Therefore, Laramie is requesting relief from the SAR and EC exceedances via FAQ 32.

Sincerely,

Joan Proulx
