CORRECTIVE ACTIIONS:

1 CA# 140384

Corrective Action: Control weeds at the appropriate time, and no later than 11/1/2020. Per CSU extension, control of Russian knapweeds requires a multi-pronged treatment approach as a single control strategy will not likely be sufficient. Areas treated for Russian knapweed should be reseeded with desirable perennial grasses in the fall to compete with the treated knapweed.

Date: 11/01/2020

Response: CA COMPLETED Date of Completion: 10/20/2020

Operator Comment: The areas with Russian Knapweed present within the reclamation area of the YF-2 production well location have been treated via mowing and spraying. The treatment areas were also re-seeded with a perenial grass seed mix. The treatment areas will be monitored and treated on a monthly basis next year.
