Subject: 2020-10-13 14:24:00/Piceance/D27 595/Release/Production/Caerus/Equipment Failure/Failed flow line discovered /Reportable/Produced Water/Volume TBD

Please review the specifics of this incident and provide feedback as needed. Due to reporting requirements, if no response to the contents of this email are received within 24 hours, agreement with the characterization and corrective actions will be assumed.

Incident Description:

A flow line failure was discovered during the routine daily trending of production data. The flow line that failed was connected to the 5A-27 well's wellhead. In order to confirm the failure, the lease operator pressure tested the line. The line lost pressure during the test. The line has been isolated and we are no longer producing fluids through it.

Corrective Action - Responsible Department

Find failure point. - Chad Tompkins

Replace line. - Chad Tompkins

Calculate volume loss. - Chad Tompkins

Submit initial form 19 to COGCC, if necessary. - Jake Janicek

Collect soil sample from soil beneath point of release. - Jake Janicek

Location Information:

District: Central District

Facility: D27 595

Latitude/Longitude: 39.590286/-108.046848

Section Township & Range: 27 5S 95W

Surface Ownership: Private

COGCC Location ID: 335574
