**Environmental****Spills/Releases:**

Type of Spill: \_\_\_\_\_

Estimated Spill Volume: \_\_\_\_\_

Comment: Stained soils in release area were not observed and appear to be cleaned up. No active release observed. Continue monitoring release area in adjacent field to verify that vegetation is not impacted from release. If vegetation starts dying in the release area, then additional remediation actions may be required. Due to the late season timing of this inspection, vegetation assessments should be conducted during the active growing season.
