Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Refer to Rules 340, 905, 906, 907, 908, 909, and 910

Unidentified aqueduct located ~630' east of produced water tank battery reports to Badger Creek.

SITE INVESTIGATION PLAN

TYPE OF WASTE:

- ☒ E&P Waste ☐ Other E&P Waste ☐ Non-E&P Waste
- ☒ Produced Water ☐ Workover Fluids
- ☒ Oil ☐ Tank Bottoms
- ☐ Condensate ☐ Pigging Waste
- ☐ Drilling Fluids ☐ Rig Wash
- ☐ Drill Cuttings ☐ Spent Filters
- ☐ Pit Bottoms
- ☐ Other (as described by EPA)

DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
Yes	GROUNDWATER	80'x70'	Lab Analytical Results
Yes	SOILS	47'x140'x10'	Lab Analytical Results

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Hub injection pump broke and pump failed. Produced water with some trace emulsion/bs&w overflowed from water tank and into berm. Field was immediately shut in. Free fluid was vacuumed and placed into tank. Impacted soil was dug out and placed on plastic and bermed. Hauled off location on 12/2/14. Pump was repaired. Another tank was placed on location to provide additional emergency capacity.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Twenty-nine (29) soil samples were collected via direct push as part of monitoring well installation/soil boring assessment activities. Eleven (11) grab soil samples were collected via shovel. Forty-one (41) grab confirmation soil samples were collected during source excavation activities. Forty-four (44) composite samples were collected following soil treatment activities. All soil samples were analyzed for BTEX, naphthalene, TPH-GRO, and TPH-DRO following EPA Methods 8260c and 8015. In addition, select soil samples were analyzed for EC, SAR, and pH following USDA Method 3, USDA Method 20B, and EPA Method 9045D, respectively.

Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Seventeen (17) groundwater samples (MW-01 through MW-17) were collected following monitoring well installation activities. All groundwater samples were/will be analyzed for BTEX following EPA Method 8260. Additionally, seventeen (17) groundwater samples were collected from MW-01 through MW-17 for analysis of chloride and sulfate by EPA Method 300.0, and total dissolved solids by 160.1. Replacement monitoring wells were installed to replace wells destroyed during excavation activities. Groundwater samples will be collected from monitoring wells MW-01R, MW-02R, MW-05, MW-14R, MW-18R through MW-21R, and MW-22 through MW-31. Additional monitoring wells will be installed to obtain point of compliance, and will be added to the groundwater sampling plan, if necessary.

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan (summary):

POC in groundwater has been achieved.

SITE INVESTIGATION REPORT

SAMPLE SUMMARY

Soil

Number of soil samples collected 81
Number of soil samples exceeding 910-1 14
Was the areal and vertical extent of soil contamination delineated? Yes
Approximate areal extent (square feet) 5640

NA / ND

-- Highest concentration of TPH (mg/kg) 10268
-- Highest concentration of SAR 20.37
BTEX > 910-1 Yes
Vertical Extent > 910-1 (in feet) 10

Groundwater

Number of groundwater samples collected 105
Was extent of groundwater contaminated delineated? No
Depth to groundwater (below ground surface, in feet) 15
Number of groundwater monitoring wells installed 31
Number of groundwater samples exceeding 910-1 12

-- Highest concentration of Benzene (µg/l) 5030
-- Highest concentration of Toluene (µg/l) 47.1
-- Highest concentration of Ethylbenzene (µg/l) 472
-- Highest concentration of Xylene (µg/l) 435
NA Highest concentration of Methane (mg/l)

Surface Water

0 Number of surface water samples collected
Number of surface water samples exceeding 910-1
If surface water is impacted, other agency notification may be required.

OTHER INVESTIGATION INFORMATION

☐ Were impacts to adjacent property or offsite impacts identified?

☒ Were background samples collected as part of this site investigation?

Soil sample SS-08 was collected for background inorganic soil analysis of EC, SAR, and pH. Monitoring well MW-17 was installed and soil/groundwater samples were collected for background BTEX, naphthalene, TPH-GRO, and TPH-DRO analysis.

☒ Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards) 17 Volume of liquid waste (barrels) 3

☒ Is further site investigation required?

Replacement wells MW-01R, MW-02R, MW-12R, MW-14R, MW-15R, MW-16R, and MW-18R through MW-21R were installed to replace those destroyed during excavation activities. Monitoring wells MW-22 and MW-23 were installed in June 2019. Monitoring wells MW-24 through MW-27 were installed in August 2019. Monitoring wells MW-28 through MW-31 were installed in June 2020. Quarterly groundwater sampling will be completed and additional monitoring wells will be installed, as needed, to maintain Point of Compliance.

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Free fluid was vacuumed and placed into onsite produced water tanks. Initial spill response impacted soil was dug out and placed on plastic and bermed. Soil was removed 12/2/14 for disposal at Buffalo Ridge Landfill. During source excavation activities from Septemebr 25, 2018 through October 4, 2018, approximately 4300 cubic yards of soil were removed and treated ex-situ with a soil shredder and hydrogen peroxide.

Additional source removal activities will be completed adjacent to soil impacts observed during point of compliance monitoring well installation activities.

REMEDATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Seven grab soil samples was collected in areas of previously observed stained soil. Monitoring wells (MW-01 through MW-16) were installed to assess potential soil and groundwater impacts associated with a pump failure and other identified surface impacts identified in Doc. No. 681700672. Additional monitoring wells (MW-17 through MW-21) were installed to define dissolved impacts in MW-05 and MW-14. Additional monitoring wells (MW-22 and MW-23) were installed to define dissolved impacts in MW-19R. Additional monitoring wells (MW-24 through MW-27) were installed to define adsorbed and dissolved impacts in MW-22. Additional monitoring wells (MW-28 through MW-31) were installed to define adsorbed and/or dissolved impacts in MW-25 and MW-26. Soil borings SB-01 and SB-02 were installed to delineate adsorbed impacts observed in MW-23, MW-24, and MW-26. Based on results of soil and groundwater sampling activities, in-situ excavation/treatment activities were performed 09/25/18 through 10/4/18 to remove adsorbed petroleum hydrocarbon impacts observed during initial assessment activities.

Additional source removal activities will be completed to remove any residual adsorbed petroleum hydrocarbon impacts. Any monitoring wells destroyed during excavation activities will be replaced. Source excavation activities will be completed based on site accessibility throughout 4Q2020 and 1Q2021.

Groundwater samples will be collected from monitoring wells onsite on a quarterly basis and analyzed for BTEX following EPA Method 8260.

Groundwater will be monitored for natural attenuation until no further action can be recommended.

Soil Remediation Summary

<input type="checkbox"/> In Situ	<input checked="" type="checkbox"/> Ex Situ
_____ Bioremediation (or enhanced bioremediation)	Yes _____ Excavate and offsite disposal
_____ Chemical oxidation	_____ If Yes: Estimated Volume (Cubic Yards) _____ 17

☐ Air sparge / Soil vapor extraction

Yes _____ Natural Attenuation

☐ Other _____

GROUNDWATER MONITORING

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

Thirty-one (31) monitoring wells (MW-01 through MW-31) were installed around the entire facility. Groundwater samples were collected from the monitoring wells following installation activities. Groundwater samples were/will be analyzed for BTEX following EPA Method 8260. Additional monitoring wells will be installed to achieve point of compliance if necessary. Replacement wells were installed for monitoring wells MW-01, MW-02, MW-12, MW-14, MW-15, MW-16, and MW-18 through MW-21, destroyed during excavation activities.

Additional groundwater samples were collected for chloride and sulfate analysis by EPA Method 300.0 and total dissolved solids by EPA Method 160.1.

Additional inorganic groundwater samples will be collected from monitoring wells MW-01R, MW-02R, MW-05 through MW-11, MW-12R, MW-13, MW-14R, MW-15R, MW-16R, MW-17, and MW-18R through MW-21R, MW-22 and MW-23 and any additional point of compliance monitoring wells to monitor/compare inorganic concentrations, on an annual basis if additional data is required.

Semi-annual BTEX groundwater monitoring is requested on the following monitoring wells: MW-01R, MW-02R, MW-05, MW-14R, MW-18R, MW-19R, MW-20R, MW-21R, and MW-22 through MW-31. As additional excavation activities may destroy monitoring wells, replacement wells will be installed and sampled accordingly to maintain point of compliance.

The following monitoring wells were removed from the quarterly BTEX monitoring plan: MW-03(destroyed), MW-04 (destroyed), MW-06, MW-07 through MW-12, MW-12R, MW-13, MW-15R, MW-16R, and MW-17. Wells will be added back to the monitoring plan as necessary.

REMEDIATION PROGRESS UPDATE

PERIODIC REPORTING

Frequency: ☒ Quarterly ☐ Semi-Annually ☐ Annually ☐ Other _____

Report Type: ☒ Groundwater Monitoring ☐ Land Treatment Progress Report ☐ O&M Report
☐ Other _____

WASTE DISPOSAL INFORMATION

Was E&P waste generated as part of this remediation? Yes _____

Describe beneficial use, if any, of E&P Waste derived from this remediation project:

No beneficial use.

Volume of E&P Waste (solid) in cubic yards _____ 17

E&P waste (solid) description impacted soil above COGCC Table 910-1 _____

COGCC Disposal Facility ID #, if applicable: _____

Non-COGCC Disposal Facility: Waste Management Buffalo Ridge _____

Volume of E&P Waste (liquid) in barrels _____ 3

E&P waste (liquid) description Produced water _____

COGCC Disposal Facility ID #, if applicable: _____

Non-COGCC Disposal Facility: Magpie produced water tank _____

REMEDIATION COMPLETION REPORT

REMEDIATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No _____

Do all soils meet Table 910-1 standards? No _____

Does the previous reply indicate consideration of background concentrations? _____

Are the only residual soil impacts pH, SAR, or EC at depths greater than 3 feet below ground surface? No _____

Does Groundwater meet Table 910-1 standards? No _____

Is additional groundwater monitoring to be conducted? Yes _____

RECLAMATION PLAN

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

The site is currently an active facility. Reclamation is not needed at this time.

Is the described reclamation complete? No _____

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

☐ Interim? ☐ Final?

Did the Surface Owner approve the seed mix? _____

If NO, does the seed mix comply with local soil conservation district recommendations? _____

IMPLEMENTATION SCHEDULE

PRIOR DATES

Date of Surface Owner notification/consultation, if required. _____

Actual Spill or Release date, if known. 10/26/2014

SITE INVESTIGATION DATES

Date of Initial Actions described in Site Investigation Plan (start date). 10/26/2014

Date of commencement of Site Investigation. 04/05/2018

Date of completion of Site Investigation. _____

REMEDIAL ACTION DATES

Date of commencement of Remediation. 10/26/2014

SITE RECLAMATION DATES

Date of commencement of Reclamation. _____

Date of completion of Reclamation. _____

OPERATOR COMMENT

The next quarterly event would be completed in October 2020. Semi-annual monitoring plan (April and October) pending approval. Additional source excavation activities will be completed 4Q20 through 3Q2021 pending site accessibility and weather conditions. Excavation maps and soil sample locations will be included in supplemental 27s.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
