Comment:

Corrective Action:	<p>Location is out of compliance with Reclamation rules. Final Reclamation activities should have been completed by 9/17/20.</p> <p>Though re-contoured, location and access road have not been de-compacted (cross ripped to 18" required) or seeded. Mulching/stabilization was not observed. It appears that all gravel/rock was not removed before re-contouring. Pieces of debris (cement?) remain on south edge of site.</p> <p>Refer to Stormwater Section where erosion controls are addressed and to Photo Log attached.</p> <p>Perform Final Reclamation per COGCC 1004 Rules, including compaction alleviation, seeding of site and reclamation of access road. Install appropriate BMPs to stabilize location until vegetation establishes. All Reclamation Activities were to be complete by September 17, 2020.</p>	Date	09/17/2020
Overall Final Reclamation	Fail	Well Release on Active Location	<input type="checkbox"/>
		Multi-Well Location	<input type="checkbox"/>

**Storm Water:**

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment
Comment:	<p>BMPs have not been installed to stabilize the location until vegetation establishes. There are no BMPs at downgradient points/perimeters of site or access road and lack of stabilization of exposed soils. At former point of culvert on access road (Swale area in Photo Log), a point that will be a natural stormwater drainage, there are no erosion controls installed.</p>					
Corrective Action:	<p>Install appropriate BMPs to stabilize location and access road until uniform vegetation establishes across all disturbance areas. Site should have been stabilized by 9/17/20.</p>					
Date:	09/17/2020					
Pits:	<input type="checkbox"/> NO SURFACE INDICATION OF PIT
