Photo 1. View of the project area from the northwestern corner facing center.

Photo 2. View of the northern project area from the northwestern corner facing eastward.

Photo 3. View of the southern project area from the southeastern corner facing westward. Grasses such as intermediate wheatgrass and smooth brome are becoming established.

Photos 4/5. View of Canada thistles (left) and musk thistles (right) within the project area. Weeds largely appear treated, but surviving individuals remain. Weeds are largely treated, but surviving weeds remain.

Photo 6. View of reference area comprised of open grass field, largely in a grazed and dormant vegetative condition at this time. Smooth brome and crested wheatgrass are identifiable.
