Comment:

This form is being submitted to correct formations, production reporting and perforation depths on the scout card, prior to P&A. Permitting request. The original completion report submitted in 1984 unfortunately did not include any of the Niobrara completion information. Also the date of first production listed on this form does not align with other documentation (attached), which suggests that both Nio and Codell were completed, commingled and producing more around 2/10/1985.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
