Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

Grand River Gathering was notified by 3rd party producer of a possible leak on the C15W pipeline on the well pad. Grand River Gathering Personnel were immediately dispatched to the C15W well pad location. Produced Water (PW) associated with the pipeline leak had largely saturated surface soil in the area immediately adjacent to the pipeline leak and within well pad containment berms. Field deliniation indicate that PW potentially travelled 8.5' off well pad. Enviromental Response crews have been dispatched and remediation of impacted ares will begin immeadiately. Based upon surface extent and depth of saturation, leak / produced water estimate is 1.3 bbls. Cause of leak will be determined following pipeline excavation and repair.
