INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

KPK is requesting to remove the out of service production pit, PIT ID #115239. The production pit is currently listed under Operator #59500 (Monsanto Oil Company). The pit will be permanently closed per Rule 905.b.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Final vertical and horizontal extent of excavation area will be based on results from collected grab soil samples. All soil samples will be analyzed for TPH - DRO, GRO & ORO, BTEX, pH, EC, and SAR and verified compliant with COGCC Table 910-1. At a minimum, one grab sample will be collected from each excavation wall as well as from the base of the excavation area.

Proposed Groundwater Sampling

OTHER INVESTIGATION INFORMATION

☐ Were impacts to adjacent property or offsite impacts identified?

☒ Were background samples collected as part of this site investigation?

One (1) background sample (Sample ID #012) was collected for reference. Same sample collection method was used for the background sample as was used for the other collected samples.

☐ Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards)

Volume of liquid waste (barrels)

☒ Is further site investigation required?

Hand augering will be conducted within the investigation area to determine 1) if soil was impacted from the historical operations 2) extent of soil impact. Grab samples will be collected from each boring location at a total depth of 3 feet below ground surface. Each sample will be field screened using PID headspace measurement technique. All samples with elevated readings will be brought to a lab for additional analysis.
