1	Deny drilling permits until new rules are in place. SB-181 is law; it requires public health safety to be the very top priority. Therefore no fossil fuel drilling permits should be approved, nor should the applications even be accepted, before the new COGCC rules are determined and implemented. You're supposed to prioritize clean air, clean water, clean soil, safety from explosions, safety from earth sinkage, safety from water exploitation, & safety from social injustice which has allowed the safety of minorities & lower-income people to be undermined by drilling activity which affluent, predominantly white people successfully shoved off.	08/27/2020
