COMMENTS:

The well was originally TA'd because a gas purchaser had not been found. The future plans are to find a gas purchaser and sell gas. The well bore has a packer and tubing with the packer set 112 ft above the perforations. The tubing/casing annulus is filled with packer fluid and the top of tubing has a valve and bull plug.

Engineer	This expired form is accepted for the record. It does not extend TA status beyond what was most recently submitted and approved nor does it approve any outstanding forms.	11/30/2020
Engineer	The well has not produced in over 20 years. The previous form 4 from 2009 (doc #1769406) states similar conditions (wating on gas market). Are there any future plans for this well aside from waiting?	12/12/2019
