Comment:

This form is being submitted to correct perforation depths on the scout card, prior to P&A. Permitting request. The original well completion report submitted in 1992 unfortunately has a few noticeable errors. The top Nio perf, number of holes in Nio and the date of first production are all off by a couple feet or a couple days on this report? Attached is the true well completion history and WBD from 1992 with perfs, number of holes and a date of first production which align more accurately to other documents in the file.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
