#### COMMENTS:

Bradenhead pressure was found to be greater than 50 psi. Samples have been collected for analysis to aid in determining origin of gas.

HPOC is blowing down the Bradenhead daily for a 3-6 month period and will maintain pressure records for a re-evaluation of the stabilized Bradenhead pressures at that time. We will update the state on our progress by submitting a follow-up Form 17 and Form 4 at the end of this period
