INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Foundation is planning to collect soil samples at the Federal 3-10 pit location from the proposed sample locations shown on the attached map, with a hand auger decontaminated between each sample.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Foundation proposes to collect 5 samples by hand auger for the pit closure investigation- 1 base sample, and 4 sidewall samples. The sidewall samples will be analyzed for EC, pH and SAR, assuming they are collected within 3' of the natural ground level. All samples collected will be analyzed for GBTEX and DRO. The samples will be preserved on ice and delivered to Summit Scientific in Golden, CO.

Proposed Groundwater Sampling

OPERATOR COMMENT

Please forward to John Heil.

Information within the Supp. Form 27 is related to the Federal 3-10 (Facility ID 119465) pit closure and includes initial investigation activities, field screening results, confirmation analytical data and soil sample location map. Samples were collected from the pit bottom surface, as well as at every 1 foot interval to a maximum depth of 5 feet. Soils were field screening with the instruments mentioned within the Initial Investigation and results indicated hydrocarbon concentrations did not exceed Table 910-1. A sample was collected from the bottom of the pit at 5 feet below the pit bottom (~8 feet below the pad surface) and analyzed for full Table 910-1. Samples were also collected from the side walls at a depth of ~1 foot laterally and analyzed for a reduced analyte list consisting of DRO/GRO/BTEX/Inorganics as approved in the Initial Form 27. All confirmation soil results indicate compliance with Table 910-1 with the exception to arsenic. Consideration is being requested in accordance with FAQ 31, as arsenic levels are comparable to other background levels in the region. Foundation Energy is requesting closure of the Federal 3-10 (Facility ID 119465) and REM #13164.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
