FACILITY - API Number: 05-067-00 Facility ID: 216188

Facility Name: HUBER-LEWIS Number: 2-33  
Qtrqtr: SWSE Sec: 33 Twp: 35N Range: 8W Meridian: N  
Latitude: 37.253760 Longitude: -107.747900

CORRECTIVE ACTIONS:

1 CA# 144885

Corrective Action: -Operator needs to assess the cause of vegetation die-off (ie bareground herbicide runoff, etc.) within the eastern project area and take actions to prevent further degradation. Submit plan via Form 4 that describes measures taken to prevent further vegetation loss including a description of any stormwater BMPs, changes in herbicide schedule or type, soil sampling, seeding, and timeline, by 12/30/2020.

Date: 12/30/2020

Response: CA COMPLETED Date of Completion: 12/21/2020

We have submitted a Form 4 Doc No: 402558033, with the following information listed out: Hilcorp Energy has assessed the cause of vegetation die-off and believe it was a result of a late season herbicide treatment in the fall

Operator Comment: of 2018 followed by an extremely wet winter. Snow was bladed off the location and piled near the eastern edge of location were during the spring runoff it melted and flowed off of location with the herbicide causing the vegetation die-off.

Corrective Action:

1. Herbicide treatments will only be conducted during late spring early summer to prevent further vegetation loss from storm water runoff.
2. Storm water controls will be establish along the eastern edge of location. A diversion will be installed by May 31st 2021 that will run north to south on the eastern edge of location that will spill the storm water out on a flat area just north of the north rig anchor to prevent further head cutting along the eastern edge of location.
3. Hilcorp will not conduct soil samples at this time since we know the origin of the vegetation die-off.
4. Barren flow path areas along the eastern edge of location will be treated with Humate soil conditioner and seeded by May 31st 2021.
