**COMMENTS:**

Request to combust is being made as a result of Anadarko/Western Midstream shutting down their Third Creek Gathering System in May of 2018 which was the gas sales outlet for the Morris 13-4. Attempts to acquire strategic portions of the Third Creek System have been stymied by Anadarko and their complete unwillingness to consider any transfer of ownership. There is currently no other active gas infrastructure within 10 miles of the lease. Given the very nominal amount of gas produced at this lease it is going to be difficult to justify any new pipeline connection. It is estimated that approximately 1/2 MCFD from the well will be flared using a 98% efficient combustor.

A gas sample collected 8/11/2020 had H2S below detectable limits and is attached.

Adherence to CDPHE air permitting requirements will be observed.

Operator Comments:

This flaring request is being made necessary by the completely unprecedented shutting down in May of 2018 of the Anadarko/Western Midstream Third Creek Gathering System. The Morris 13-4 is making approximately 1 1/2 BOPD and 1/2 MCFD. Oil revenue dominates the economics of this well. Given Anadarko/Western Midstream Partners defiant attitude in utilizing their legacy assets in the area to reconnect wells it is not known when a gas deposition solution will be found for this leases gas combustion. It is hoped that COGCC could possibly broker a resolution to this impasse.
