**General Comment:**

Spill Inspection

Pumper had previously called on 12/7/2020 to say that there was a spill at the tank battery. Vac truck was on location and have removed the free oil. Stained soil remained. Free oil observed under ice on first (north) produced water pit. REMOVE this free oil as soon as ice melts.

See inspection 688000503 and Form 19 #402548533/402548745 for COGCC EPS corrective actions that includes among other things to move tanks, collect samples, provide analytical results and disposal manifests, provide sketches, provide root cause and lessons learned.
