General Comment:

Operator is in bankruptcy.

This well is ~300' from a house. Bradenhead pressure had built up and took >30 secs to blow down with a hydrocarbon odor. There are two water wells permitted near the house, one is in the alluvium and one on 400' deep (in Denver formation).

OWP stickers/locks needed.

No pit was observed but there is an open pit permit in the COGCC database. From historic aerial, the pit may have been location north of the separator and access road.
