Comment:

The access road and location have not been reclaimed. There is an area at the location that has no vegetation growth that is approximately 120'x120' area. There maybe soil issues impacting vegetation growth. The access road does not have adequate vegetation and consists of predominately undesirable weeds (Kochia sp.). It does not appear that any reclamation work has been performed. The corrective action of the previous inspections has not been performed. Corrective action needs to be performed immediately to obtain compliance.

Corrective Action: **Comply with 1004 Rules.**Date **04/30/2015**Overall Final Reclamation **Fail**Well Release on Active Location ☐Multi-Well Location ☐**COGCC Comments**

Comment	User	Date
Establish vegetation with total perennial non-invasive plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture that matches the adjacent CRP pastureland. Continue to monitor and manage this site until Final Reclamation has Passed.	CostaR	12/31/2020
