COMPLETED INTERVAL REPORT

The completed interval Report, Form 5A, shall be submitted within thirty (30) days of completing a formation (successful or not), when a formation is temporarily abandoned or permanently abandoned, for a recompletion, reperforation or restimulation, or when a formation is commingled. Fill out a section for each formation. Attach as many pages as required to fully describe the work. List in order of completion.

Comment:

This form is being submitted to correct production reporting, formation information, and number of holes on the scout card, prior to P&A. Permitting request. The original well completion report submitted in 1989 unfortunately did not include the Ft. Hays perms or it's completion information at all, even though a WBD submitted at that same time has Ft. Hays listed (in addition to Niobrara and Codell). This well has been producing Niobrara/Ft Hays/Codell this entire time, attached is the completion history with further details.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
