13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Foundation is in the process of closing unused, unlined produced water pits at well locations in this area. The pits will be remediated to COGCC Table 910-1 standards as necessary. Foundation conducted on-site visits with the BLM representative in order to determine if landfarming could be approved as a remediation method on soils that exceed COGCC's Table 910-1 standard. Foundation is submitting this request to landfarm hydrocarbon-impacted soil at the above location in accordance with discussions at the on-site meetings. The landfarmed material will be bermed. Foundation anticipates landfarming activities to extend between 4 months and 1 year in order to obtain representative samples showing the landfarmed material has been remediated.

14. I hereby certify that the foregoing is true and correct.
