#### COMMENTS:

Renegade requests approval of alternative MIT for the Champlin 248 Amoco A#1 as allowed for by Rule 326.b(3) after Director consideration of any equivalent test or combination of tests.  
Renegade believes the Champlin 248 Amoco A#1 demonstrates mechanical integrity due to a 12/27/2019 bradenhead test (Doc #402273740) performed showing no bradenhead pressure and tubing/casing pressure of 560/575 psi coupled with a 10/21/2020 bradenhead test (Doc #402524415) conducted showing no bradenhead pressure and tubing/casing pressure of 625/625 psi. The Champlin 248 Amoco A#1 was completed with a Port Collar tool at 1663' and cemented with 450 sacks of cement. If the well lacked integrity old drilling mud would kill the well and casing pressure would not continue to build. Well pressures including the bradenhead will be monitored monthly to ensure integrity.  
This well is SI as a result of the Third Creek Gas Gathering System shutdown on 6/1/2018 and was producing at the time of SI. The Champlin 248 Amoco A#1 was produced utilizing plunger lift equipment.
