- Other Alternative MIT _____

COMMENTS:

Renegade requests approval of alternative MIT for the Running Creek #15-3 as allowed for by Rule 326.b(3) after Director consideration of any equivalent test or combination of tests.

Renegade believes the Running Creek #15-3 demonstrates mechanical integrity due to a 11/30/2020 bradenhead test (Doc #402557038) performed showing no bradenhead pressure and tubing/casing pressure of 247/247 psi. The Running Creek #15-3 was completed with a DV tool at 2130' and cemented with 200 sacks of poz cement. If the well lacked integrity old drilling mud would kill the well and casing pressure would disappear. Well pressures including the bradenhead will be monitored monthly to ensure integrity. This well is SI as a result of the Third Creek Gas Gathering System shutdown on 6/1/2018 and was producing at the time of SI. The Running Creek #15-3 was produced utilizing plunger lift equipment.

Operator Comments:

This Form 4 is being filed for the Running Creek #15-3 in response to a need for an alternative MIT approval to satisfy a COGCC Warning Letter (Doc # 402491859) dated 9/17/2020. Renegade's response to the warning letter has been attached. Conversations with Diana Burn of the COGCC coupled with the well's circumstances has led to the belief that this filing is ripe for approval.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
