## COMMENTS:

Whiting requests permission to flare gas from this location. The gas production generated at this facility is minimal and it would be economically infeasible to install the approximate 1.3 miles of pipeline needed to connect into the nearest infrastructure.

Location of the nearest gas gathering infrastructure - 1.3 miles  
Estimated cost associated with connection - \$858,000  
Hydrogen Sulfide - <1 ppm  
Average Daily Gas Flaring - 6 MCFD

Operator Comments:

This is the initial request to flare at this facility. An internal audit of our holdings showed that approval to flare and vent at this facility needs to be obtained.

Flared gas from the heater treater is permitted with the CDPHE (Permit # 16RB0904) and emissions generated, including flaring, remain within the permitted level.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
