## DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
UNDETERMINED	SOILS	undetermined	Laboratory analysis

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Bonanza Creek Energy plugged and abandoned the Monahan Federal #24 wellhead on 12/18/2020. As a direct result of the P&A activity, the associated production facility is being decommissioned. There is one (1) concrete water vault on location that was removed on 1/4/2021. There was no visual or olfactory evidence of impact to the surrounding soils. One grab type soil sample was collected from the bottom of the open excavation and submitted for laboratory analysis. PID readings were collected from each sidewall.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

One grab type soil sample was collected from the bottom of the excavation and submitted for laboratory analysis for TPH (DRO), TPH (GRO), BTEX, pH, EC, and SAR under EPA Method 8015B, 8260D, 9045D, 9050A, and 20B respectively.

### Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

### Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

### Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

If impacted soil is observed or if analytical results indicate levels greater than COGCC Table 910-1 concentrations, the media will be removed and hauled to a COGCC approved disposal facility. Confirmation soil samples will then be collected from each sidewall as well as the bottom of the excavation and submitted for laboratory analysis.

## REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.
